SUMMARY

2.5+ years of industry experience, Currently engineering a comprehensive **Fraud Intelligence system** that integrates **GenAI risk Insights** with performance optimization. Focus includes analyzing utilization across **millions of merchant rules** and implementing logic consolidation features to streamline fraud prevention strategies.

WORK EXPERIENCE

Visa (Software Engineer) Apr 2025 – Present

- **Took full ownership** of a high-throughput Kafka consumer service, managing the **end-to-end development** of real-time FX rate streams and reducing latency by **120ms**.
- Orchestrated **complex DAG-based workflows** and implemented a Redis caching layer to eliminate **40%** of redundant database calls, significantly boosting system reliability.
- **Architected** and deployed an MCP server integrated with Visa's internal cloud to **streamline the E2E deployment pipeline**, and slashing developer setup time from hours to minutes.
- Developed **GenAI-enabled** dashboards analyzing 6–12 months of fraud and risk data into actionable insights.
- Developed a **cross-functional** Figma-to-UI conversion tool using GenAI, bridging the gap between design and engineering and cutting turnaround time in half.

Morgan Stanley (Software Engineer - Contractor Via Accolite) Mar 2024 – Apr 2025

- Designed a **generic, reusable** streaming JSON API using StreamingResponse, enabling **memory-efficient** incremental data transfers for massive datasets.
- **Spearheaded the design** of scalable ETL workflows using Airflow, optimizing task orchestration to cut processing time by over one-third.
- Leveraged GraphQL to build a **flexible data retrieval layer**, drastically reducing network overhead through precise, targeted data fetching.
- Developed custom data connectors to **bridge disparate data sources**, persisting structured data into Neo4j with Cypher optimizations that **doubled ingestion speed**.

Accolite (Software Engineer) Nov 2023 – Mar 2024

- Completed intensive **full-stack** training in Java, Spring Boot, and Angular, delivering a secure production-ready application.

SKILLS

Languages	Java, Python, SQL
Frameworks/Tech	Spring Boot, FastAPI, ReactJS, Kafka, Redis, Airflow, GraphQL, GenAI, Rest APIs, Unix, Docker, AWS, Kubernetes, Microservices, System Design
Databases	MySQL, Neo4j
Tools	IntelliJ, VS Code, Postman, Jenkins, Git, Github, Cline, Grafana, Splunk, Claude Code

PROJECTS

Requirement and Fulfillment Tracker (Java, Spring Boot, Angular, MySQL) Accolite

Spearheaded the end-to-end development of a full-stack requirements platform featuring **JWT-based authentication** and a reactive **RxJS UI** to streamline client tracking and data integrity

Tasky (Java, Spring Boot, React, SQL) Personal Project

Designed and Built a high-performance task management system with **Redis Caching** and **OAuth2**, implementing **API rate limiting** and role-based access control for data integrity

EDUCATION

2019 – 2023	B.Tech, KIET Group of Institutions	(CGPA: 8.5/10)
2017 – 2019	Class XII (ICSE), Seth MR Jaipuria School	(89%)
2015 – 2017	Class X (ICSE), Seth MR Jaipuria School	(91.2%)
